DETAILED ACTION

The USPTO is participating in a search exchange pilot program with the European Patent Office (EPO). As part of the pilot program, the USPTO has received a copy of the Search Report prepared by the EPO on the counterpart EP application for which priority under 35 U.S.C. 119(a) is claimed. The references cited in the EPO Search Report have been considered by the examiner and have been listed on the PTO-892 form. A copy of these references is not being furnished to applicant with this Office action. It will not be necessary for applicant to submit these references in an information disclosure statement.

The examiner has made use of the I.D.S. submitted in the application.

Specification

1. The disclosure is objected to because of the following informalities: The written disclosure is objected to for lacking headings such as the " BACKGROUND OF THE INVENTION" and, " BRIEF SUMMARY OF THE INVENTION, etc.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2817

In claim 2, lines 4-6, it is recited that " ...a first switch transistor(M3') placed in parallel to the first cascode transistor(M4), and a second switch(M5') placed in parallel to the second cascode transistor(M6)..." where is this configuration supported in figure 2.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-6 (as best understood)are rejected under 35 U.S.C. 102(e) as being anticipated by Kawasumi(US 6,415,007, cited by examiner)

Art Unit: 2817

The reference by Kawasumi discloses a charge pump with cascode output, see figures 5 and 8, that is used in a electronic PLL circuit.

The charge pump comprises cascode transistors(P7,N5), and intermediate switches(P6,N6), and nodes(A between(N6,7) and (B between P5,6)). A first switch transistor(N2) is shown and a second switch transistor is shown(P2), these receiving the complementary signals of the intermediate switches(P6,N6). Note intermediate switches(P6, N6) are coupled across(N2,P2). Note also, the additional cascode circuit(P3,N1) in a dummy branch consisting of(P2,P3,N1,N2) in parallel to the primary branch(P6,P7, N5, N6).
